
I work in Software & AI Engineering, with broad hands-on experience across programming languages and technologies including TypeScript, JavaScript, Python, React, Next.js, Node.js, Express, PostgreSQL, PHP, HTML/CSS, and Docker. I have built end-to-end web applications and have solid knowledge of agile methodologies, Git, data structures, and algorithms.

As a Full Stack Teaching Assistant, I coordinated student groups and strengthened leadership, communication, organization, adaptability, time management, proactivity, and problem-solving. My AI experience includes model training and evaluation, code review, prompt interpretation, and tool-use tasks, alongside applied AI Engineering with RAG, LangChain, LangGraph, Langfuse, tool-using agents, multi-agent systems, structured outputs, and multimodal workflows. Earlier experience in customer service and property management adds client communication, negotiation, and operational management skills.

English Level: Advanced.

PROJECTS

Full Stack Web Developer - Videogames App

Jul. - Aug. 2023

Academic experience. Henry Bootcamp.

I developed an application that provides users with detailed information about video games, allowing them to post new games with their respective platforms and genres. Users can filter and find games that match their search, while creators can showcase their products. The application consumes information from an external API and allows for the registration of new video games in the database.

- **Frontend:** React, Redux, CSS.
- **Backend:** NodeJS, Express.
- **Database:** PostgreSQL and Sequelize.

Full Stack Web Developer - Descuentos Ya App

Aug. 2023

Academic experience. Henry Bootcamp.

Collaborated with a team of students to build a platform connecting businesses and club members, providing access to exclusive discounts through a responsive, intuitive interface with a mobile version.

Skills: Next.js, Express.js, PostgreSQL, Tailwind CSS, React Native.

Job Tracker - Full Stack Collaborative Project 2023

Personal, non-commercial project developed with a team of developers.

Built a full-stack application to help job seekers track applications and follow-ups, manage related files, and keep professional profile links in one place. The project was developed without AI-generated code.

Skills: React, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Prisma. Private repository.

Freelance Full Stack Developer - ICASA Corporate Website 2025 - 2026

Professional freelance project.

Developed and deployed a production corporate website end-to-end, including responsive UI, project gallery, geolocation, contact flows, email integration, domain/DNS configuration, and production deployment.

Skills: Next.js App Router, TypeScript, Tailwind CSS, Resend, Vercel, Git/GitHub.

<https://icasa.ar>

Freelance Full Stack Developer - ITC Internal Operations Tool Apr. - May 2025

Professional freelance collaboration with ITC, an internet service provider in Mendoza.

Contributed to an internal web tool for field operators to record equipment changes, prioritize upcoming household visits, and manage recurring technical issues more efficiently.

Main technology: PHP.

Freelance Full Stack Developer - VIANSA Website 2026

Professional freelance project.

Developed and deployed a bilingual corporate website with responsive layouts, branded visual implementation, optimized media content, and production domain configuration.

Skills: Next.js, TypeScript, Tailwind CSS, Vercel, Git/GitHub.

<https://viansa.com.ar>

AI Engineering - Applied AI Projects 2026

Academic and portfolio projects. Henry.

Built retrieval-augmented generation systems, tool-using agents, multi-step and multi-agent workflows, structured-output pipelines, and multimodal applications using vision and audio capabilities.

Skills: Python, OpenAI API, embeddings, FAISS, LangChain, LangGraph, Langfuse, Pydantic, RAG, tool use.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer 2023 - Present

- Deliver end-to-end web projects and collaborations, from UI implementation and application logic to service integrations, deployment, domains, production configuration, and internal operational tools.
- Across software development projects, I have worked with TypeScript, JavaScript, Python, React, Next.js, Node.js, Express, PostgreSQL, PHP, HTML/CSS, Tailwind CSS, Docker, Git/GitHub, and Vercel.

Freelance AI Trainer & Code Reviewer - Outlier Dec. 2023 - Apr. 2025

- Worked across multiple freelance projects reviewing code in Python, JavaScript, and TypeScript for correctness, quality, and task compliance.
- During 2024, evaluated prompts and model responses and used Google tools such as Search, Maps, and Flights to improve response quality, tool use, and instruction understanding.
- Selected as a reviewer based on performance; during the second half of 2024, supervised other contributors' work and coordinated meetings to improve shared interpretation of tasks.

Full Stack Teaching Assistant 2023 *Academic experience. Henry Bootcamp*

- Coordinated a group of students to facilitate integration into the study team.
- Assisted in problem-solving and promoted group collaboration (Pair Programming).
- Proposed ideas for improving Bootcamp processes.

Property Management Oct. 2019 - Present

- Search, drafting, and negotiation of contracts with potential clients/tenants.
- Administration and maintenance of properties for tourist or family use.
- Fostered communication between owners and tenants, prioritizing a good relationship and optimizing the quality of the offered product.

Tournament Organization, Web Development & Social Media - Intercompany Soccer League

Work experience at LFI and "El Alargue" Tournament Jul. 2015 - Nov. 2016

- Participated in tournament organization and coordination, communicated with participating companies, and supported participants throughout the events.
- Led the organization's website, technology needs, and social media, including website content/photo galleries, participant communication, feedback handling, and service improvements.

OTHER EXPERIENCES

BlowMax

Jan. 2017 - Jan. 2018

Wholesale hypermarket with numerous branches in key tourist locations in the Province of Mendoza.

Work experience in customer service, merchandise stock control, and cash management at important locations such as the Mendoza Airport and main city malls.

PROFESSIONAL EDUCATION

- Full Stack Web Developer. Henry Bootcamp. 800 hours of theoretical and practical coursework. 2023.
- AI Engineering. Henry. Successfully completed with outstanding performance; RAG, embeddings, agents with tools, LangChain, LangGraph multi-agent orchestration, structured outputs, and multimodal vision/audio workflows. 2026.
- Prompt Engineering Certificate. OutlierEDU.
- Python Programming Course. Sensus3D's Software Engineer. 2020.
- Studied Computer Engineering for four years at the University of Mendoza (2010 - 2013); degree not completed.

LANGUAGES

- Spanish: Bilingual or native proficiency.
- English: C1, Intermediate-Advanced Professional proficiency.

TECHNOLOGIES

- Programming Languages: TypeScript, JavaScript, Python, PHP.
- Frontend & Frameworks: React, Next.js, Redux, Tailwind CSS, LangChain, LangGraph.
- Backend & Databases: Node.js, Express, PostgreSQL, Sequelize, Prisma.
- Web Technologies: HTML, CSS, REST APIs.
- **AI Engineering:** OpenAI API, RAG, embeddings, FAISS, LangChain, LangGraph, Langfuse, tool use, multi-agent systems, structured outputs, Pydantic, multimodal vision/audio.
- Tools & Infrastructure: Git, GitHub, Docker, Vercel, VS Code, Postman/Thunder Client, WSL.
- Currently Learning: Microsoft Azure and cloud infrastructure.
- Agile: Scrum.
